

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the Twelfth Plymouth Representative District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2002.

Residents of Twelfth Plymouth Representative District

Characteristics of Admissions

In FY 2002, there were 124,539 admissions to licensed substance abuse treatment services in all of Massachusetts; 1.4% (1,698) of these admissions reside in the Twelfth Plymouth Representative District. 2% (30) of admissions from the Twelfth Plymouth Representative District were under 17 years of age. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2002, admissions to all residential and outpatient substance abuse treatment services from the Twelfth Plymouth Representative District reported the following characteristics:

- 79% were male and 21% were female.
- 62% were between the ages of 21-39.
- 83% were white non-Latino, 6% were black non-Latino, 6% were Latino, and 4% were other racial categories.
- 62% were never married, 16% were married, and 22% reported not to be married now.
- 24% had less than high school education, 52% completed high school, and 24% had more than high school education.
- 35% were employed.
- 9% were homeless.
- 29% had prior mental health treatment.

Primary Substance of Use

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Twelfth Plymouth Representative District.

Table 1					
Primary Drug by District and State FY 2002					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	58%	24%	8%	4%	1%
State	45%	37%	6%	4%	3%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (or IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2 Annual Admissions by Substance Used: FY 1995 – FY 2002							
Twelfth Plymouth Representative District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '95	1,135	983	420	341	179	198	134
FY '96	1,275	1,050	473	348	186	242	182
FY '97	1,456	1,188	527	382	213	265	191
FY '98	1,563	1,255	482	358	172	297	205
FY '99	1,730	1,399	575	451	209	339	243
FY '00	1,597	1,212	508	403	191	358	249
FY '01	1,620	1,273	528	355	162	382	251
FY '02	1,698	1,267	498	374	153	469	346

Heroin and Injection Drug Use

Figure 1 below shows the proportional increases in all admissions in the Twelfth Plymouth Representative District and the proportional increase in admissions reporting heroin and injection drug use, a factor driving increases in HIV.
